## SAMPLE WORK (AS PART OF TRIDAZ S.R.O.)

This document contains a non-exhaustive list of the work I've been primarily involved with as part of my 2-year period of working with Tridaz s.r.o.

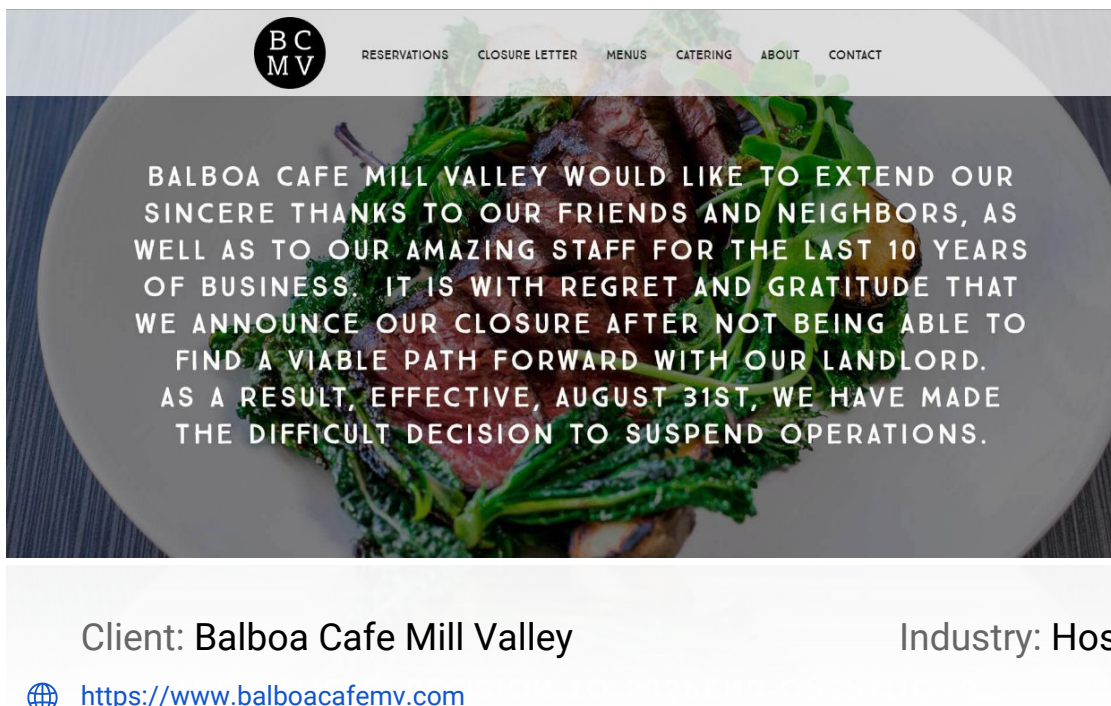

Client: **DuRhone Chocolatier Switzerland**   Industry: **Food, HoReCa**

🌐 https://www.du-rhone.ch

I've been tasked by my team to aid with the execution and maintenance of a website for a Swiss luxury chocolatier producer, specifically:

- To do a complete rewrite of the front-end CSS and JS, primarily to improve responsiveness and cross-browser compatibility
- To rewrite the back-end and front-end code for the online shop to accomodate our client's new requirements (layout, product customization experience)
- To write the front-end and back-end business logic for product customization functionality, as it is a key business area of our client the possibility of which was yet to be implemented (was missing) in the previous versions of the website
- To investigate and improve the loading times and overall performance of the landing and shop pages.
- To communicate and problem-solve directly with the client
- To future-proof and to do maintenance as provisioned by our contract with the client.
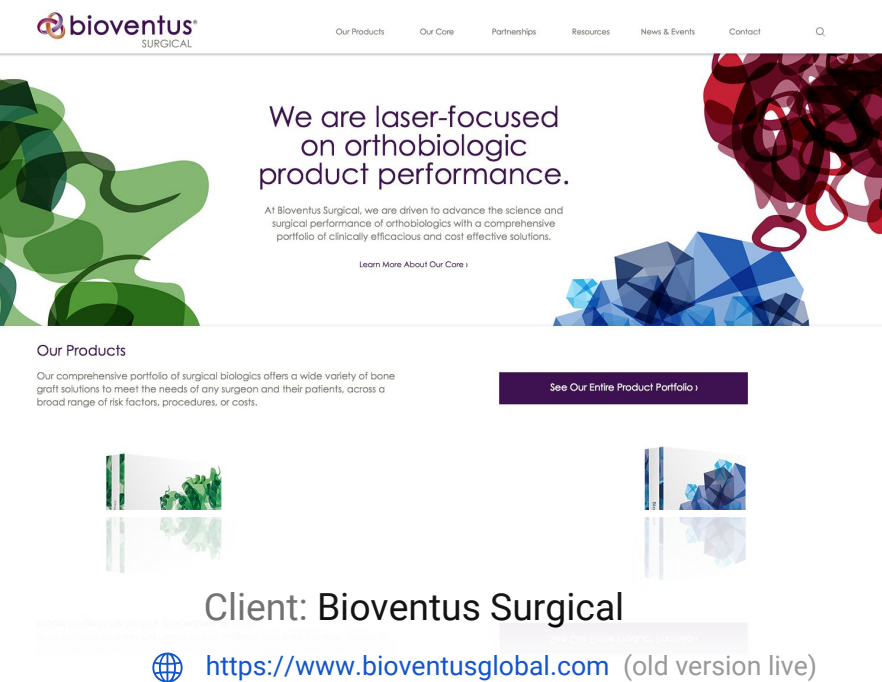

SAMPLE WORK (AS PART OF TRIDAZ S.R.O.)

Client: Balboa Cafe Mill Valley   **Industry:** Hospitality, Restaurants

🌐 https://www.balboacafemv.com

I've been tasked by my team with the execution of a website for a restaurant in Mill Valley, California. This included:

- Coding the client-provided design into a fully-functional Wordpress theme (front-end and back-end)

- Making it accessible for mobile users without resorting to a separate front-end (making the CSS responsive)

- To write from scratch or to adapt an existing plugin for OpenTable reservations.

- Writing a plugin for a custom-formatted Instagram gallery

- Making the website accesible for visually-impaired users

- Making the back-end user-friendly, self-explanatory and easy to use

- Communicating and problem-solving directly with the client

- Future-proofing and maintenance as provisioned by our contract with the client.

SAMPLE WORK (AS PART OF TRIDAZ S.R.O.)

Client: Bioventus Surgical

🌐 https://www.bioventusglobal.com (old version live)
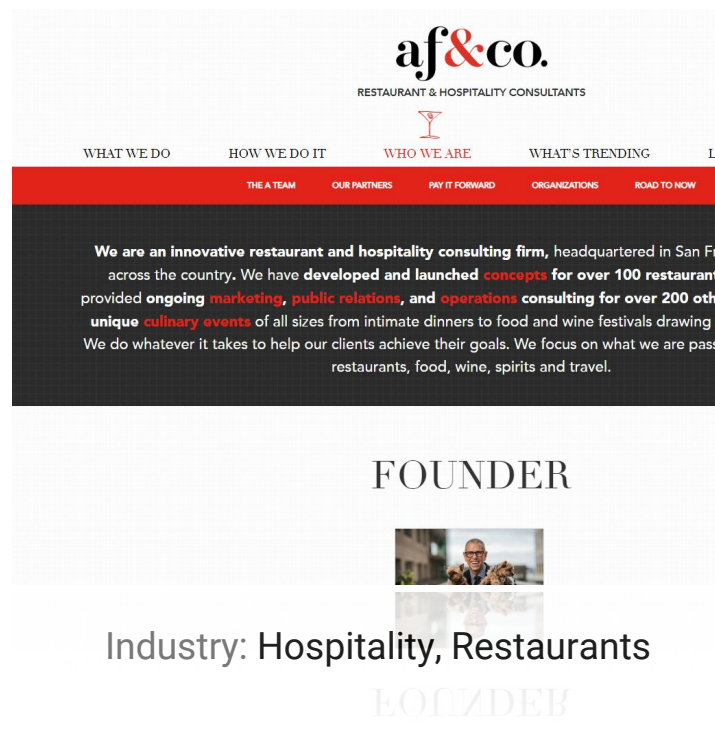

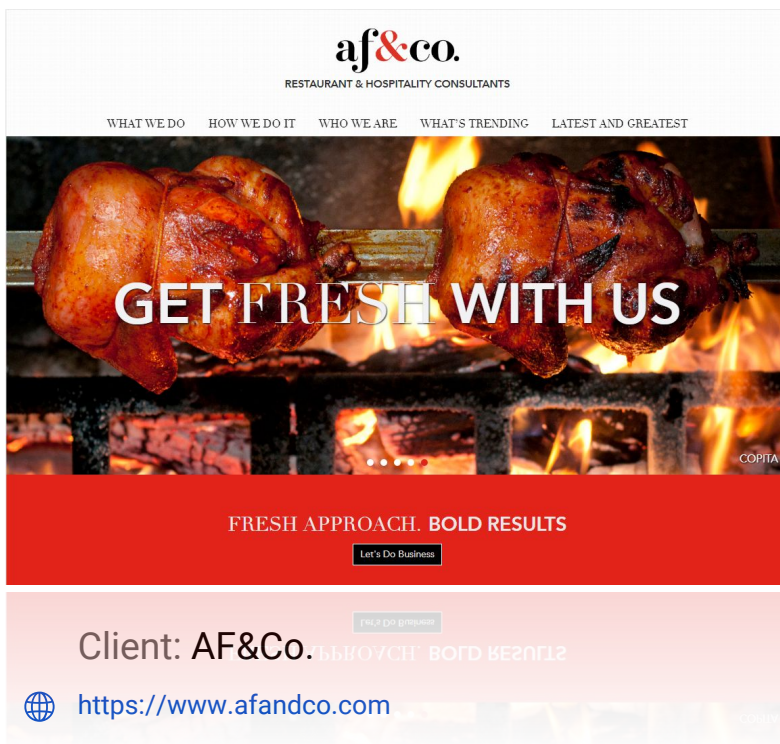

Industry: Medical, Pharma

I've been tasked by my team with the execution of the new version of the Bioventus marketing website. Unfortunately due to reasons that were outside of our control, their marketing department decided to backtrack with their plans to update their website.

- Implementing the front-end and back-end of the website, as per client's designs/sketches/specification.
- Responsive design: making the CSS work on resolution-constrained devices without resorting to another front-end.
- Making the website user-accessible for people with reduced or impaired vision.
- Time constrained: the client wanted the new version to be ready for preliminary testing and review 30 days after the signing of the contract..
- To communicate and problem-solve directly with the client
- To future-proof and to do maintenance as provisioned by our contract with the client.

SAMPLE WORK (AS PART OF TRIDAZ S.R.O.)

Client: **AF&Co.**

🌐 https://www.afandco.com

Industry: **Hospitality, Restaurants**

I've been tasked by my team with the execution of a website for a restaurant in Mill Valley, California. This included:

- Coding the client-provided design into a fully-functional Wordpress theme (front-end and back-end)

- Making it accessible for mobile users without resorting to a separate front-end (making the CSS responsive)

- Writing a plugin for a custom-formated Instagram gallery

- Making the website accesible for visually-impaired users

- Making the back-end user-friendly, self-explanatory and easy to use

- Communicating and problem-solving directly with the client

- Future-proofing and maintenance as provisioned by our contract with the client.
